Profile Summary

Software Development Engineer with 5 years of hands- on experience specializing in front-end development using **React Native, Next JS, React.js, TypeScript and Javascript**. Proven track record of enhancing web application **performance**, leading optimizations, and successfully migrating projects to modern tech stacks. Skilled in **Vite.js, Material UI**, and state management tools like **Redux Toolkit**. Strong problem-solving skills with a focus on improving build times and user experience through innovative solutions such as **lazy loading** and **virtual scrolling**. Passionate about delivering **scalable** and efficient solutions in enterprise-level applications.

Education

B.Tech National Institute Of Technology, Rourkela, Computer Science — Jul 2016 – Jun 2020

Experience

Optym, Senior Software Developer Engineer — Bangalore, IN — Jun 2026 - Present

- Developing and Maintaining **RouteMax** Driver App. **RouteMax** App is used in Transport Domain for pickup and delivery routes optimizations .
- Developed the Route Max mobile application using React Native to optimize pick-ups and deliveries.
- Collaborated with cross-functional teams to enhance driver navigation and data entry for pickups and deliveries.
- Ensured a user-friendly interface that improved the overall experience for drivers.
- RouteMax App is developed using React Native Core.

PakaTec, Software Development Engineer — IN — Apr 2025 - May 2026

- Developed **WePong** Mobile Application using **React Native** and **Expo** for **Table Tennis Game Booking**, Developed Entire Flow and suggested changes as required.
- Developed **WePong Back Office** Web Application using **Next JS 14** and **React 19** for **Table Tennis Game**.
- Developed **AGUI** AI Web Application using **Next JS 14** and **React 19**. It's a **Server Driven UI** Application that works like modern AI responses powered website to provide information.
- Developed **PortLan** AI Crypto Manager Application using **Expo** and **React Native**. It's a AI-first, non-custodial **crypto** portfolio manager. Unifies **exchanges** and **wallets** into a single conversational interface. Added **RNFirebase** library for **Google O-Auth** to Sign In to the app.
- Added CI/CD pipelines using Github Actions.

Nakad, Software Developer Engineer — Gurgaon, IN — Apr 2023 – Apr 2025

- Led front-end development for an enterprise web application automating **accounting reconciliation** and **supply chain financing**.
- **Analyzed and resolved complex technical issues** by troubleshooting software bugs and performance bottlenecks, ensuring smooth product functionality.
- **Collaborated closely with product managers and engineers**, providing input on the development of new features to meet evolving customer needs.
- Managed technical relationships with stakeholders, offering **technical support**

and feedback to both internal teams and external customers.

- **Skills**: React, React Native, TypeScript, JavaScript, CSS, Tailwind, Node

Netcracker Technology, Junior Software Engineer — Hyderabad, IN
Oct 2020 – Apr 2023

- Developed **PL/SQL procedures** to implement business logic for the **Rating and Billing Manager**.
- Designed and enhanced the **application UI** using **Delphi** to meet product requirements.
- Built and improved features using **Delphi** and **Oracle technologies**, ensuring quality through **unit testing**.
- Created Table Schema and wrote migration scripts using **Oracle SQL**.
- Developed an internal **CRUD browser app** using **Angular**, employing modern features such as **reactive programming** and **lazy-loaded modules**, which improved app load time and performance.
- Developed Pills Web based Music App developed to listen to songs from your favorite artists using **React**, (details below this page).

Projects

WePong Mobile App

- **WEPONG** is autonomous table-tennis club management app for Casual users and Members — end-to-end booking, payments, door unlocking, real-time match management, and match history with video recordings.
- **Core flows**: user registration & OTP auth, table booking, payments via WebView, door-unlock integration, match scheduling and history.
- **Real-time**: live match/event updates (**SSE**) and real-time score management.
- **Notifications**: Firebase Cloud Messaging **push notifications**.
- **Data & offline**: TanStack **React Query** for caching/sync and **AsyncStorage** for local persistence.
- **Cross-platform**: Built with React Native + Expo (iOS / Android).
- **Internationalization**: **i18next**-based multi-language support.
- **UI/UX**: **Gluestack UI** components, **NativeWind** (Tailwind), **Lottie**, **Reanimated** and @legendapp/motion for animations.
- **Integrations & tooling**: **Firebase** (app & messaging), **WebView payments**.
- **Tech stack**: React 19, React Native 0.79, Expo ~53, TypeScript, Axios.

Pills By Nitz — darc-coder/pills

- Pills is a Web based Music App developed to listen to songs and music from your favorite artists
- The app was created using React following latest state management technologies like Redux and Context API, The app is also PWA (Progressive Web App) compatible, allowing it to be installed on your mobile device like a regular application.

  Live URL: **nitz-pills.netlify.app/**
- Tools Used: React, JavaScript, React PWA

Nakad App

Nakad App is an enterprise web application for **accounting automation** . It automates **accounts receivable/payable reconciliation**.

Key highlights:

- Migrated App to **Vite.js**, cutting build time by **70%**.

- Implemented & Improved **CI/CD pipelines** for **GitHub Actions** for the project.
- implemented **lazy loading** to improve load time by **30%**.
- **Virtual scrolling** for table components increased **render speed by 70%** .
- Introduced **Es-Lint** for code quality and **Error Boundaries** for runtime error handling.
- Live version: **app.nakad.co/**
- Tools Used: React, Typescript, JavaScript, Vite.js

SakshiVani App darc-coder

- SakshiVani App, is an Christian Hymn Book App that Provides Hymn in Hindi Language.
  Live URL: **SakshiVaniApp/**
- Tools Used: React Native (Expo + Native Modules)

Technical Skills

General Programming:	Python, CSS, Javascript, TypeScript, React, NextJS - Advanced C++, Java, Node JS, Angular, PLSQL, React Native, Expo - Intermediate UNIX, Web Performance - Beginner
Databases:	Oracle, My SQL, PLSQL, Prisma
Other Software:	Adobe Photoshop, Adobe Premiere Pro, MS Office, Latex
